

Livestock Improvement Corporation

About LIC

Livestock Improvement Corporation (LIC) is an agri-tech and herd improvement co-operative which empowers livestock farmers through the delivery of superior genetics and technology. Headquartered in Hamilton, LIC employs more than 700 staff.

What we did

We placed a suite of 'Free on Loan' coffee machines across LIC's Hamilton campus as well as satellite sites across New Zealand.

TESTIMONIAL

"Thank you NXP for supporting LIC in our sustainability objectives with regards to the recent transition of coffee machines. The smooth roll out from your team was amazing. We love supporting local New Zealand businesses' who ethically source their products."

Melissa Kay
Procurement Administrator
LIC

How we did it

The challenge

LIC was ready to replace numerous obsolete coffee machines with new state-of-the-art, automatic fresh-bean coffee machines at their Hamilton campus.

Additionally, their smaller, remote sites across the country needed a solution to suit small offices without sacrificing taste and ease of use.

NXP's solution

Reception area: This newly built area is fitted with a premium barista-quality automatic machine, the GAGGIA La Solare (first pic). This machine is an industry workhorse, able to cope with hundreds of cups of coffee per day and fits the aesthetics of LIC's beautifully designed space perfectly.

Lunch rooms and kitchenettes: These high traffic areas serve an eager team of coffee drinkers but the bench space was limited. The NECTA Koro Prime (second pic) was the perfect solution. This machine produces a large variety of hot beverages, is robust and has a relatively small footprint.

National satellite sites: Their sites are smaller and remote. Due to the low staff count, the Lavazza LB1050 Pod Machine was the accurate choice. This small machine packs a great flavor punch, is easy to use, and requires minimal cleaning.
